BEFRIENDING CALLS

WE'VE HAD

40

REFERRALS

CASE STUDY

David was referred to us as he was feeling lonely and anxious due to COVID-19. He also couldn't go out because he was one of the shielded. As well as his befriending calls, David also needed help getting food and prescriptions.

OUTCOME

We made sure David had as many befriending calls as he needed and arranged for his local COVID-19 Support Group to collect his shopping and prescriptions. David also needed extra support due to his dietary needs. David's anxiety has reduced and he's enjoying his calls with our friendly volunteers every day of the week.
